

Virtualbox - Installation

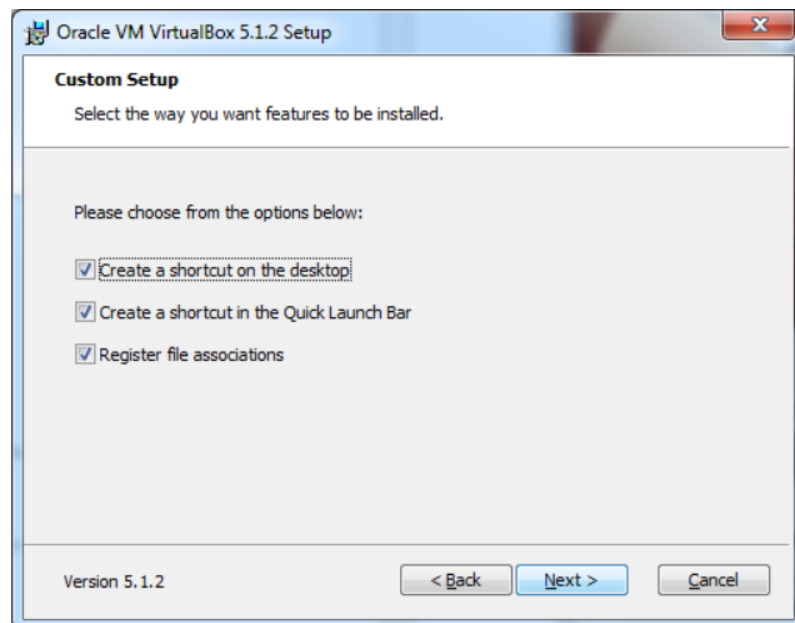

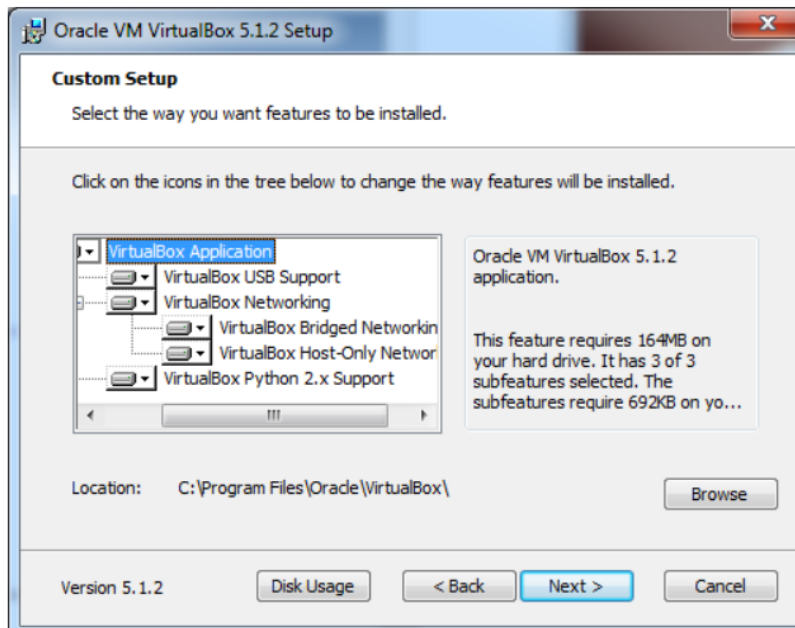

<https://github.com/BilalMaz/DevOps-Architect-BootCamp#>

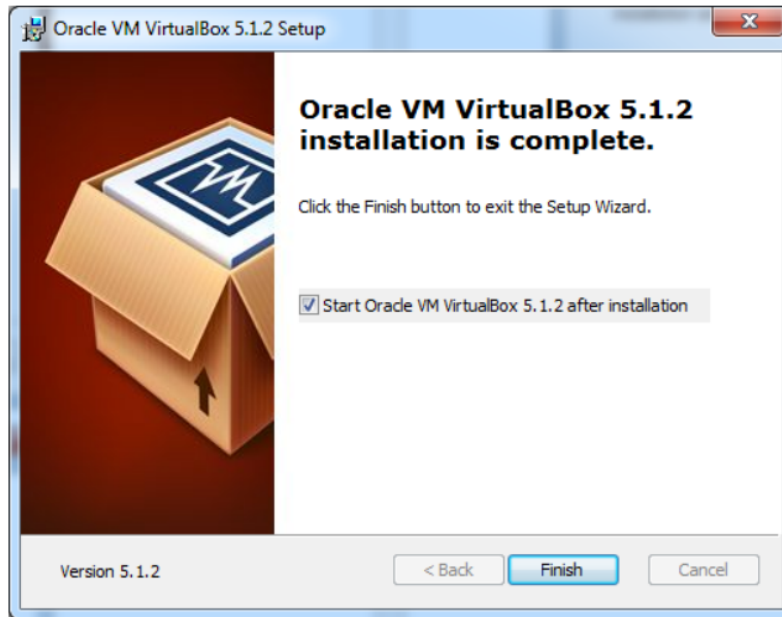

1. Go to the VirtualBox website (<https://www.virtualbox.org/>) and download the installation file for your operating system. You should see a screen like this:

2. Double-click on the downloaded file to start the installation process. You should see a screen like this:

4. Launch VirtualBox. You should see a screen like this:
